PROFESSIONAL SUMMARY

Backend-focused software engineer with 10+ years of professional experience designing and delivering scalable web platforms, payment systems, inventory workflows, and third-party API integrations.

At Newroz Technologies Limited, contributed to FastPay wallet products for Iraq and independently built the full Kartat card-selling application covering inventory, gateway, reseller, and bank partnership flows.

Strong ownership across requirements, estimation, architecture, mentoring, and delivery. Comfortable leading backend workstreams and accelerating delivery with modern AI-assisted engineering practices while maintaining code quality, security, and maintainability.

KEY STRENGTHS

- 10+ years shipping production backend systems across fintech, booking, ISP, and enterprise domains
- Built the complete Kartat card-selling platform end-to-end (inventory, gateway, reseller, bank flows)
- Delivered FastPay wallet product modules for Iraq including inventory, corporate, distribution, CRM, and activity logging
- Experienced mentoring developers, estimating delivery, and owning features from requirements to production
- Comfortable combining deep Laravel/PHP expertise with Node.js and modern AI-assisted workflows

TECHNICAL SKILLS

Backend	PHP, Laravel, CodeIgniter, CakePHP, Node.js, Express, REST APIs, WordPress
Frontend (supporting)	JavaScript, Vue.js, jQuery, Livewire, HTML5, CSS3, Bootstrap
Data & Caching	MySQL, MariaDB, PostgreSQL, MongoDB, Redis, Memcached, Firebase
Integrations & Domains	Payment gateways, Wallet systems, Inventory & distribution, CRM workflows, MikroTik / ISP billing, SMS & push notifications, Third-party API design
DevOps & Tooling	Docker / docker-compose, Nginx, Apache, Linux (Ubuntu, CentOS), Jenkins, Git, AI-assisted development

PROFESSIONAL EXPERIENCE

Software Engineer

2021 – Present

Newroz Technologies Limited · Dhaka, Bangladesh

Building innovative digital products for customers and businesses, with a focus on fintech, wallet, and card-distribution platforms.

- Owned backend delivery for Kartat card-selling products, including inventory, gateway, reseller panels, FIB Bank of Iraq reseller flows, and activity-log management.
- Contributed to FastPay wallet initiatives for Iraq across inventory, corporate, distribution, CRM, and operational logging modules.
- Designed and integrated third-party APIs for payments, stock, and partner systems using Laravel.
- Led junior developers, supported project estimation and scheduling, and improved readability and scalability of production codebases.

Technologies: Laravel, PHP, MySQL, Redis, REST APIs, Vue.js

Software Engineer

2020 – 2021

Jolzatra Limited · Dhaka, Bangladesh

Online multi-modal booking platform covering launch, bus, train, and air ticketing.

- Built and maintained Laravel backend services powering merchant operations and booking workflows.
- Collaborated with product and management stakeholders on requirements, estimation, and delivery planning.
- Improved scalability and maintainability of booking-related backend features.

Technologies: Laravel, PHP, MySQL, Vue.js, REST APIs

Software Engineer

2018 – 2020

Dream71 Bangladesh Ltd. · Dhaka, Bangladesh

Software, web, and application development company delivering enterprise and government-facing systems.

- Gathered requirements with clients and translated them into technical delivery plans.
- Led feature development and coordinated with team members on estimation, cost, and scheduling.
- Delivered backend systems for operational and domain-specific business applications.

Technologies: Laravel, PHP, MySQL, JavaScript, Node.js

Web Developer

2017 – 2018

eSoft Arena Ltd. · Dhaka, Bangladesh

Agile web development for business applications and content-driven platforms.

- Designed and coded applications in an agile environment with a focus on maintainable PHP backends.
- Created and maintained technical documentation and acted as liaison between business and engineering.
- Worked across Laravel, CodeIgniter, CakePHP, WordPress, and related frontend stacks.

Technologies: Laravel, CodeIgniter, CakePHP, WordPress, MySQL, MongoDB, Vue.js, Nginx, Apache

Web Developer

2016 – 2017

The Net Heads Ltd. · Dhaka, Bangladesh

Web application development and technical delivery support in an agile team environment.

- Designed and coded applications using a test-oriented, iterative delivery approach.
- Maintained project schedules and technical documentation.
- Coordinated across business, QA, and development stakeholders.

Technologies: PHP, MySQL, JavaScript, jQuery, HTML, CSS

SELECTED PROJECTS & CASE STUDIES

Kartat Card-Selling Platform

Case study

Lead Backend Developer

End-to-end card-selling application covering inventory management, payment gateway operations, reseller panels, bank partnership flows (including FIB Bank of Iraq), and activity logging.

- Built the full application architecture and core business modules
- Integrated third-party APIs for partner and gateway operations
- Designed reseller and distribution workflows for operational scale

Technologies: Laravel, MySQL, REST APIs, Inventory systems

FastPay Wallet (Iraq)

Case study

Backend Developer

Wallet and operational panels for FastPay initiatives serving Iraq, including inventory, corporate, distribution, CRM, and activity-log management systems.

- Delivered multiple interconnected Laravel modules for wallet operations
- Implemented stock and partner integration workflows
- Supported high-trust financial domain requirements around auditability

Technologies: Laravel, MySQL, API integrations, CRM

Jolzatra Online Booking System

Case study

Software Engineer

Multi-modal booking platform for launch, bus, train, and air travel with merchant backend and customer-facing booking experiences.

- Backend services for merchant and booking operations
- Requirement gathering and delivery planning with stakeholders

Technologies: Laravel, Vue.js, MySQL

ISP Bill Manager

Case study

Backend Developer

ISP billing platform with MikroTik integration and payment gateway support (bKash, SSLCommerz).

- Router and billing integrations for ISP operations
- Payment gateway connectivity for customer collections

Technologies: Laravel, MikroTik API, MySQL, Payment gateways

[Related package](#)

Crew Management System — Bangladesh Biman

Case study

Software Engineer

Operational crew management system delivered for Bangladesh Biman through Dream71.

- Enterprise operational workflows
- Team-based delivery

Technologies: PHP, MySQL

Library Management for BISS

Case study

Software Engineer

Library management system for BISS, later revisited in a revamp effort.

- Domain-specific operational tooling

Technologies: PHP, JavaScript
